

Help Wanted:

PCB CAD Operator

WV Communications has an opening for a PCB CAD Operator in Newbury Park, California.

Responsibilities Include:

- Schematic capture and layout of PCBs for digital and RF circuits used for prototype and evaluation boards
- Follow and see-thru the entire PCB design, including stack up, layout and fabrication
- Work with board manufacturers to get quotes, review design database and ensure quick turn-around to meet project schedules
- Maintain PCB component library
- Ability to name, create, maintain, check, and coordinate component footprints and schematic symbol library databases
- Create PCB documentation
- Work closely with RF and Digital engineers, application engineers to define the PCB and its components
- Generate Gerber Files, mechanical profiles, board fabrication stack-ups, detailed board fabrication drawing and packages, bill of materials, assembly drawings, assembly notes
- Archive closed jobs and retrieve archived jobs for re-spins

- Must be willing to work extended and flexible hours to meet critical schedules, when necessary.

Qualifications:

- Associates Degree in CAD, technical discipline, or equivalent.
- Proficient in using PCB CAD Programs, preferably Altium
- Must have Samples of work and be able to demonstrate CAD proficiency.
- Must have knowledge of PCB layout
- Familiarity of Document control procedures and the ability to adhere to established systems.
- Familiarity with Autocad Mechanical Desktop is a plus
- Must be MS Windows/Office proficient.
- Strong communication, interpersonal, analytical, and problem solving skills
- Must have a positive attitude and work well in a fast paced “team oriented” environment.
